With the change in technology, Mathematics has made a mark on almost all the fields of Information Technology. IT in turn has provided a platform for many industries to emerge and flourish across the world. Mathematics is a fundamental intellectual tool in computing, but computing is increasingly used as a key component in mathematical problem-solving. This seminar gave an opportunity to our participants to combine an appreciation of mathematical reasoning with an understanding of computing. Apart from the exchange of ideas the major focus of academic seminar was networking. It provided an opportunity to participants for collaboration, funding, employment, and other professional benefits. It brought together prominent speakers like Dr. Govindan Rangarajan, Professor, Department of Mathematics and Chairman, Division of Interdisciplinary Research, Indian Institute of Science, Bangalore; Dr. Jyotshana V. Prajapat, Professor and HOD of Mathematics, University of Mumbai; Dr. Santosh Singh , Associate Professor, Department of Mathematics, School of Natural Sciences, Shiv Nadar University, Noida; Dr. Ajit Kumar, Associate Professor, Department of Mathematics, Institute of Chemical Technology, Mumbai and other inspiring leaders and delegates. It inspired the participants from the sharing on insightful life journey and challenges from the people that have built empires. It created a valuable platform to help the participants to build a network of trusted contacts and provide them novel ideas and innovation. The seminar helped in exploring various fields correlating IT and Mathematics and their joint venture into globalizing industries.
